

# Studying in the Heart of Europe

The state of Bavaria, situated in the south of Germany, boasts nine state universities (science-oriented), seventeen state universities of applied sciences (practice-oriented) and six state universities of arts. As they are in a dynamic process of internationalisation, Bavaria's universities are increasingly offering degree courses in English. These courses are designed to attract foreign students. In addition, they aim at Germans willing to study with an international dimension.

For further information concerning the courses, please contact the university in question directly. You may also find useful information on the English websites of the Bavarian State Ministry of Sciences, Research and the Arts:
